## POLICY: Use of CAMCOR/CRIS NMR Instrumentation and Computing Resources, University of Oregon

NMR instrumentation and computing resources under the auspices of CAMCOR/CRIS are intended for use in legitimate academic, research or commercial purposes. Each use of these facilities will be subject to cost-recovery billing at published rates. Each user will be required to submit to training as deemed appropriate by the NMR facilities manager. Further, each user is required to adhere to the published NMR instrument use guidelines and facility rules.

Acceptance of an account on a CRIS facility computer or instrument binds the user to adhere to professional standards and ethics of computing. The CAMCOR/CRIS facility reserves the right to monitor computing activities of its accounts in order to enforce those standards. Unacceptable activities include unauthorized use of instruments, computers and network facilities, unauthorized access to files belonging to other users, unlawful dissemination of copyrighted materials, and sharing of computer passwords and room-entry authorization codes. Violation of these standards may result in the revocation of the privilege to use the facility.
